

SettleApp: Track and settle up your debts easily

Prague, Czech Republic (February 3rd 2014) - Ondřej Mirtes and Michal Langmajer have officially released their brand new financial app called “**SettleApp**”. It’s a simple but powerful app for instant recording of purchases and settling up of subsequent debts.

SettleApp helps people to keep track of their shared expenses in a group of friends. Unlike similar apps in the App Store, SettleApp is designed for rapid transaction tracking. It calculates immediately how to settle up all the debts in the easiest way possible.

Using SettleApp is insanely simple thanks to intuitive interface and stylish design with many useful features designed with strong focus on a great user experience.

We believe SettleApp will soon become a synonym for the shared expenses tracking apps.
